Experience

Legion Automations — Software Engineer

Aug 2025 - Present

- Architected and deployed AI voice agent workflows that reduced manual call handling by 80% by integrating React, Next.js, and GPT APIs into production customer flows.
- Built full-stack systems that cut end-to-end processing time by 70% by implementing REST APIs, WebSocket integrations, and automated workflow orchestration in Node.js services.
- Delivered responsive client-facing web platforms across 3 industries (real estate, e-commerce, and professional services) by translating requirements into modern UI/UX using Next.js and Tailwind CSS.
- Optimized application performance to improve key user interactions by 30% by profiling bottlenecks and applying frontend and API-level tuning across React components and backend endpoints.

Advantage Solutions — Sales and Tech Operations Coordinator

May 2024 - Present

- Supported sales and retail reporting for 10+ stakeholders by tracking performance, resolving data discrepancies, and streamlining workflows using internal systems.
- Coordinated platform updates that increased team throughput by 20% by aligning system changes, communications, and operational readiness with cross-functional partners.
- Analyzed and consolidated operational data into recurring reports, reducing reporting issues by 25% and improving decision speed by 15% through standardized checks and clear summaries.

Certifications

AWS Certified Cloud Practitioner — [Certificate](#)

- Validated foundational AWS knowledge across cloud concepts, core services, security, architecture & billing.

Artificial Intelligence Fundamentals — [Certificate](#)

- Gained foundational knowledge of AI concepts, machine learning, and real-world applications.

LFS158: Introduction to Kubernetes — [Certificate](#)

- Learned container orchestration fundamentals including deployments, services, and cluster management.

Leadership & Projects

Scalable Code Execution Orchestrator — [GitHub](#)

- Built a distributed execution engine processing 15000+ jobs daily with Kubernetes orchestration, Redis, Docker, DynamoDB and autoscaling policies that reduced average job latency by 35%.

CodeHaven – CI/CD Deployment Platform — [GitHub](#)

- Designed a microservices deployment platform using Redis pub/sub and WebSockets to support 50+ concurrent deployments and reduce rollback time to under 2 minutes via automated artifact/version handling.

Multimodal Video Sentiment SaaS — [GitHub](#)

- Developed an end-to-end SaaS using Next.js and FastAPI scaled to 1200+ daily API requests and deployed with AWS SageMaker, authentication, rate limiting, and quota management.

YouTube Comment Analysis Extension — [GitHub](#)

- Created a Chrome extension backed by FastAPI and AWS Lambda that improved API efficiency and reduced cloud costs by 25% through response-time optimization.

Education

Seneca Polytechnic, Toronto, Canada – Diploma in Computer Programming

Concentration: Full-Stack Software Development, Cloud & Distributed Systems, Scalable Application & Backend Engineering, Artificial Intelligence, Machine Learning

Skills

Technical Skills: RESTful APIs, Microservices, Distributed Architecture, System Design, Scalability, Real-Time Data Processing (WebSockets), Database Design, Performance Optimization, Cloud Computing, AI/ML, Computer vision, unit testing, NLP, Express, Jira, debugging, Linux,

Programming & Frameworks: C++, Python, JavaScript, TypeScript, React, Next.js, Node.js, FastAPI, Redux

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Jenkins, Terraform, MLOPS, Ansible

Databases: MongoDB, PostgreSQL, SQL(DDL/DML)

Soft Skills: Problem Solving, Analytical Thinking, Communication Skills, Team Collaboration, Adaptability, Time Management, Attention to Detail, Critical Thinking, Ownership & Accountability, Reliability, Creativity
